Striim | Microsoft Azure

Accelerating Time to Insight

Striim and Microsoft enable customers to achieve sustained agility that allows them to pivot and adapt in real-time, add layers of intelligence to their applications, and unlock fast and predictive insights from data wherever it resides.

Accelerating time to insight wherever data resides, Striim and Microsoft provide customers with a way to break down data silos and eliminate the complexity of data integration, enabling data engineers, data scientists, and business analysts to get real-time data when and where they need it most.

The Value of Striim and Microsoft Azure

- Unlock fast and predictive insights from data wherever it resides.
- Pivot and adapt to new realities in real-time.
- Achieve sustained agility, break down data silos and eliminate the complexity of data integration.

Business Benefits

Striim offers continuous integration from a wide range of on-premises and cloud-based sources such as databases, data warehouses, log files, messaging systems, sensors, and NoSQL solutions to Microsoft Azure with in-flight transformations, making data immediately available upon arrival.

With over 150 pre-built connectors for streaming data, you can power your organization's digital and cloud transformation with real-time data integration and streaming.

Sample use cases:

- Oracle to Azure Synapse
- Oracle to Azure Databricks Delta Lake
- Oracle to Azure Database for MySQL/Postgres/MariaDB
- MongoDB to Azure Cosmos DB
- Oracle to Snowflake

Fast CDC, Real-Time Analytics

Striim enables the movement of low-latency data into Microsoft Azure data services, providing customers a continuous source of real-time data to take advantage of downstream processing. Only Striim offers this unmatched scalability and Change Data Capture (CDC) at scale for real-time transformation and data analytics.

Streaming Integration to Microsoft Azure

Striim provides an enterprise-grade, template-based cloud service to ease your migration and real-time data flow into Azure.

Striim has an offer to get you started:

- Striim streamlines your transition to Azure and increases the value you gain from cloud services.
- Subscribe to Striim as a cloud service on Azure Marketplace to stream into Azure SQL and Azure Storage.
- Contact us at **info@striim.com** or contact your Azure account executive to sign up for a proof of concept to move enterprise data to Azure from Oracle, SQL Server, HPE NonStop, MySQL, and more from on-premises data centers or in the cloud with zero downtime and zero data loss.

AT A GLANCE

>150 Prebuilt Connectors. Seamlessly connect sources and targets across private, hybrid, and multi-cloud environments.

Real-Time. Move data to databases and data warehouses in milliseconds, not minutes.

Cloud-Native Security. Purpose-built for mission-critical applications.

Reliability. Built-in recovery that can guarantee exactly-once or at-least-once processing (E1P/A1P) for your critical data flows.

Infinitely Scalable. Designed with a distributed clustered architecture that enables it to easily scale horizontally to meet your data processing needs.

Operational Analytics. Custom dashboards for your own real-time analytical workloads.

SQL-Based Transformations. Leverage your knowledge of SQL for real-time data processing and ETL.

Low Total Cost of Ownership. Quick to deploy and ramp-up. Unify and simplify your data integration and analytics efforts.

Key Features

- **Fastest Oracle CDC on Earth.** High performance log-based change data capture streams incremental changes to targets with minimal impact on sources, networks, and applications.

- **Continuous Replication.** Replicate data continuously in real-time to enable application availability and disaster recovery.

- **Smart Data Pipelines.** Build smart data pipelines in real-time that connect any enterprise system in a modern cloud architecture. Leverage best-in-market Streaming SQL to deliver real-time data ready for analysis. Merge live streams with external data for lambda views and analysis and perform continuous queries and loads.

- **Schema Evolution and Data Validation.** Ensure data consistency and readiness with efficient validation that compares sources and targets on an ongoing basis. Striim's intelligent schema evolution lets you define how to propagate changes to downstream subscribers.

- **Real-Time Analytics & Data Insights.** Analyze and visualize continuously ingested data with dashboards, monitoring, alerts, visualizations, and reporting. Ideal for fraud detection and risk management.

- **Deploy Anywhere.** Striim Platform is available to deploy to on-premises environments and in the Azure cloud as a Platform-as-a-Service (PaaS), and Striim Cloud is available as a Software-as-a-Service (SaaS) offering, all from the Microsoft Azure Marketplace.

> "*Striim simplifies our data integration capabilities to replicate data from our strategic application datastores for our Cloud Analytics platform while reducing engineering efforts.*"

Powerful	Real Time	Agile
• Move your on-premises and cloud-based data without downtime • Prevent data loss with built-in validation • Save costs by offloading operational reporting	• Feed on-premises data to the cloud in real time, in the right format • Continuously visualize and monitor data pipelines for urgent insights • Receive real-time alerts	• Proactively respond to business events • Prevent data loss with built-in validation • Run the old and new systems in parallel
